SUMMARY

AI/ML developer completing a Post-Diploma in Integrated Artificial Intelligence at SAIT (Calgary) with a Computer Science Engineering background. Builds production-style ML and GenAI applications using Python, FastAPI, Streamlit, SQL/SQLAlchemy, scikit-learn, LightGBM, RAG, and Azure. Focused on explainable outputs, human-in-the-loop review, auditability, and responsible AI product design.

TECHNICAL SKILLS

Programming	Python, SQL, JavaScript, Git / GitHub
AI / Machine Learning	Classification, Regression, LightGBM, XGBoost, Scikit-learn, Model Evaluation, Feature Engineering, Explainable AI, Responsible AI
NLP / GenAI	NLP, TF-IDF, RAG, Embeddings, Vector Search, ChromaDB, Prompt Guardrails, Citation-Backed Answers
Backend & Apps	FastAPI, Streamlit, REST APIs, Pydantic, SQLAlchemy, Docker, Azure, CI/CD
Data & Databases	Pandas, NumPy, Statistics, EDA, Data Visualization, SQLite, PostgreSQL

PROJECTS

TriageAI / SympDirect - ESI Clinical Intake & Care Routing Assistant · [GitHub](#)

- Built an end-to-end healthcare AI decision-support workflow with FastAPI, Streamlit, SQLAlchemy, and real LightGBM ESI 3/4/5 inference over structured intake data.
- Implemented safety-rule escalation, clinician accept/override workflow, required override reason, audit logging, dashboard views, assessment detail pages, and PDF decision-support reports.
- Validated model scope with 272 features, ESI 5 threshold 0.60, about 78.4% accuracy, about 70.6% macro F1, and low ESI 3-to-ESI 5 safety-critical error.

Python · FastAPI · Streamlit · LightGBM · Scikit-learn · SQLAlchemy · SQLite · pytest · PDF Reporting

PolicyGPT Enterprise - Evidence-First RAG Assistant for Policy PDFs · Phase 1 MVP · [GitHub](#)

- Built a RAG document intelligence MVP for HR, SOP, and compliance PDFs using PyMuPDF extraction, metadata-rich chunking, SentenceTransformers embeddings, and ChromaDB retrieval.
- Added evidence scoring and fallback guardrails so unsupported questions return insufficient-evidence responses instead of hallucinated answers.
- Created FastAPI endpoints and a Streamlit dashboard with citation cards, retrieval transparency, provider configuration, and health checks.

Python · FastAPI · Streamlit · ChromaDB · SentenceTransformers · PyMuPDF · RAG · Groq/OpenAI-compatible APIs

ResumeIQ - AI Resume Intelligence & ATS Analysis Platform · [Demo](#) · [GitHub](#)

- Built an NLP resume analysis platform with TF-IDF, Logistic Regression, skill extraction, ATS compatibility scoring, template detection, and AI-like sentence quality checks.
- Modularized parsing, preprocessing, prediction service, ATS scoring, skill extraction, and sentence-quality logic for easier extension to JD matching and rewrite suggestions.

Python · NLP · TF-IDF · Scikit-learn · Logistic Regression · Streamlit · Pandas · Azure

EXPERIENCE

Web Application Developer · Dreamview Technology · Gujarat, India · Jan 2023 - Dec 2024

- Delivered client websites and web applications end-to-end, from requirements and UI design to development, launch, and support for small business clients.
- Built responsive front-end workflows, database-backed features, and REST-style integrations while managing client timelines independently.

Web Developer · Divyaraj Design INC. · Gujarat, India · Oct 2021 - Nov 2022

- Developed and maintained client web projects, contributing to UI implementation, front-end development, and collaborative project delivery.
- Worked across multiple client engagements handling responsive layouts, cross-browser compatibility, and iterative design-to-code workflows.

EDUCATION

Integrated Artificial Intelligence - Post-Diploma Certificate · SAIT, Calgary, AB · Jan 2026 - Aug 2026 (Expected)
Applied Statistics · Predictive Analytics · NLP · Computer Vision · AI Governance & Ethics · Human-Centred AI · AI Management & Maintenance · Web Development & Cloud Computing · Capstone Applied Projects
Supply Chain Management & Logistics - Post-Graduate Certificate · MacEwan University, Edmonton, AB · Jan 2025 - Dec 2025
Operational domain knowledge in logistics, process analysis, and supply chain data applied to AI systems in operational domains.
Bachelor of Engineering - Computer Science · Gujarat Technological University, India · Undergraduate · First Class · 60.60%
Computer Science Engineering foundation with software development, databases, algorithms, and web application coursework.

WORK AUTHORIZATION

Legally authorized to work in Canada · Valid Study Permit and Co-op Work Permit through Nov 2026
